

Project Superintendent

Job Description:

Provide overall on-site administrative and technical management on the construction project site. Plan, direct and control work activities. Monitor project schedule and enforce all site safety regulations. Deal with employees and subcontractors in actual job duties beyond giving and receiving instructions. Coordinate, assign work, and manage all company employees, and craft employee activities on the entire project on a day-to-day basis in order to maintain the quality and schedule of all work.

Qualifications:

Minimum 5 years in commercial construction with a proven track record of success.

Travel is Required.
